EXAMINER'S RESPONSE

1. In response to the application filed 6-27-01, the application has been examined. The examiner has considered the presentation of claims in view of the disclosure and the present state of the prior art. And it is the examiner's opinion that the claims are unpatentable for the reasons set forth in this Office action:

Claim Rejections - 35 USC § 102 & 103

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claims 1-8 are rejected under 35 U.S.C. 102(a, b and/or e) as being anticipated by Larson (US 5245652), Trempala (US

Art Unit: 2635

5612683) or Glick (US 5749253). Larson, Trempala and Glick disclose lock systems with uploading and downloading of codes, information and instructions (commands and/or software). These patents may use electronic keys to transfer codes, information and instructions where the key includes intelligence such as a microprocessor and therefore represents a smart card.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Pinnow (US 4931789) discloses a lock system with lock instructions input from a remote terminal.
